HUMMINGBIRD CAUTION

Shepherd's Hooks can be deadly to your wild feathered and furred friends!

I love feeding and watching hummingbirds and other birds, even pecks squirrels that visit our yard. These hummers will be back soon and are starting to show up in Texas.

I've had as many as ten feeders up, so last spring I purchased two Shepherd's Hooks, each with two hanging areas.

One day last fall there were 15-20 Ruby-Throated hummers zooming around the feeders. While look out, I saw one hummer and immediately realized something was terribly wrong. Unfortunately, I was too late. One of the little males had caught his neck in the "V" of the pole and was deceased when I found him. I put a folded paper towel in the "V" to keep this from happening again. I have rubber washers layered to block the "V".

ARBOR DAY-April 28

Arbor Day is a celebration of trees and their importance to providing shelter, stabilization for the ground and beauty to the beholder. While Arbor Day is a US holiday, several other countries have adopted similar observances including Japan, Australia, Korea and Yugoslavia. In 1970 President Richard Nixon declared Arbor Day a federal holiday and it is observed the last Friday in April each year.

Arbor Day Facts & Quotes

The first Arbor Day was celebrated April 10, 1872 in the State of Nebraska. More than 1 million trees were planted in Nebraska as they celebrated the first Arbor Day.

A single tree can absorb as much as 48 pounds of carbon dioxide per year and can sequester 1 ton of carbon dioxide by the time it reaches 40 years old.

Newspaper editor, Julius Sterling Morton began arbor Day to help bring attention to the importance of trees.

Since the Yellowstone Fires of 1988, the Arbor Day Foundation has partnered with the US Forest Service. Through this partnership, over 25 million Arbor Day Foundation trees have been planted.

The best time to plant a tree is twenty years ago. The second best time is now.—Proverb
