

Update from the Board of Directors

The Point Aquarius road project is underway, the weather has been cooperative and we made great progress until the rain Sunday night (4/17/16). Paving has been completed on one lane of the outbound side, and we are scheduled to pour additional concrete later this week/beginning of next week. We anticipate completing the lanes and curb around mid-May.

We will begin installing sprinkler lines between FM 1097 and the Security Gate immediately following completion of the paving. We are waiting to place new lines post road construction to prevent possible damage by the road construction equipment. It has been a challenge keeping the Entrance looking nice without a nearby source of water. The sprinkler line construction will require about 10 additional days of patience from our residents and visitors.

Thank you for working with us as we complete these improvements. We hope to have the area tidied up before Memorial Day.
